Upcoming Webinar - GOM Inspect Suite

After running successful webinars in 2020, we are ready to host our first webinar for this year on **March 18, Thursday at 3 pm AEDT**. The Webinar will be providing first-hand experience of the industry leading 3D Inspection Software by GOM, which is absolutely free to use. You will learn about the newest software updates and ensure you're not missing out on any features. Through the webinar, users will learn how about the new GOM Inspect Suite 2020, create and understand multiple

alignments, how to perform GD&T Analysis, and participate in a **live Q&A** with our industry experts. You will learn to ***Meet all your Quality Inspection needs.***

Register your interest for the Webinar

What's happening at Scan-Xpress?

Before border restrictions were reinstated the team was fortunate enough to travel to NSW and QLD to visit current and prospective clients. We are very excited by the relationships built and with our personnel expansion in these states, we look forward to developing more industry relationships outside of VIC.

About Us

Let's talk about Zeiss' products

Our business partnership with ZEISS continues and we could not be happier. We received a T-SCAN hawk in December last year. The product is an ideal solution to assist with every step of every task, ranging from 3D data to the delivery of high quality results. It's designed to be portable, precise and to make a difference.

AESUB SCAN SPRAY

The 3d scanning spray by AESUB has been a hot-seller for a long time now. We decided to shoot a video in-house of how easy it is to use the spray. The video will be available on our website and on our socials by the first week of March.

Educational posts

We have kicked off a series of educational blog posts to keep readers well informed of the industry. The first post revolved around the trends transforming 3d scanning. Keep an eye out on our blog posts for upcoming educational posts as well.
