GOM Inspect Suite Webinar - Available Now

After running successful webinars in 2020, we hosted our first webinar for this year on March 18. The Webinar provided first-hand experience of the industry leading 3D Inspection Software by GOM, which is absolutely free to use. Those who attended learnt about the newest software updates and ensured that they did not miss out on any features. For those of you who did not attend, we have made the Webinar public on our website and YouTube channel. By watching this Webinar, you will

learn how to use the new GOM Inspect Suite 2020, how to create and understand multiple alignments, and how to perform GD&T Analysis.

What's happening at Scan-Xpress?

With border restrictions eased, our team visited NSW and QLD this month. We are very excited by the relationships built and with our personnel expansion in these states, we look forward to developing more industry relationships outside of VIC.

[About Us](#)

Happy Holidays from Scan-Xpress!

The team at Scan-Xpress would like to wish you all a Happy Easter and we hope you have a wonderful month ahead! Keep an eye out on our website and social media pages for regular updates and news from the industry.

AESUB BLUE VIDEO

The 3d scanning spray by AESUB has been a hot-seller for a long time now. We decided to shoot a video in-house of how easy it is to use the spray. The video is now available on our website, YouTube channel, and on our social media pages.

Webinars by GOM

Our partners at GOM have scheduled two webinars in the month of April. The first one is on April 14 and will demonstrate how optical 3D metrology can be used to achieve end-to-end quality assurance in sand, die casting and investment casting processes. The next one on April 15 will demonstrate how to use optical 3D metrology to accelerate all process steps in tool life cycle.
